

LOWER KING STREET STREETSCAPE NOTICE

DECEMBER 30, 2008

- ☺ We hope everyone had the best holiday season possible. Anson Construction will re-mobilize Streetscape operations beginning Monday, January 5, 2009. Anson, the sub-contractors and the City look forward to getting the project underway. Staff met during the break to review progress and examine the remaining schedule. In order to complete the project in a cost effective and timely manner the sequencing of utility installation and hardscaping construction has been set accordingly. The Streetscape staff will continue to do our best to reasonably accommodate individual situations. However, with the remaining work, the schedule must move forward as planned.
- ☺ The half block between Market Street and 206 King Street was given a thermal treatment to burnish the edges of the bluestone. Staff will perform a final inspection of the bluestone on this area the first week in January.
- ☺ New traffic signalization work will begin at Market and King Streets the month of January.
- ☺ Hardscaping will continue in the block between Fulton Lane and Clifford Street with the removal of the temporary surface, the base poured and installation of the bluestone. Fulton Lane might be closed to complete the electrical conduit work, but parking will be accommodated in the Peterson Lot.
- ☺ Sewer laterals repair work continues immediately upon re-mobilization between Clifford and Queen Streets.
- ☺ Staging for multifarious jobs in the block on the east side of King Street between Queen and Broad Streets begins January 5th and runs through the month. A water main, electrical conduit and a large electrical vault near Queen Street, but on King Street and in the sidewalk near the County Garage, will be installed. Demolition will occur first, and then a crane will be placed to install the vault. Metered and loading zone parking on the west side of King Street will be eliminated as well as the east side lane on King Street from about 156 to 150 King Street so that one lane can accommodate vehicular traffic. During the course of this mini-project, the traffic pattern will change and notice will be given.

*The Old Year has gone.
Let the dead past bury its
own dead. The New Year
has taken possession of
the clock of time. All hail
the duties and possibilities
of the coming twelve
months!*
